

10.2 "Finding Arc Measures"

Across

- 7. circles that can be mapped onto each other by a rigid motion or a composition of rigid motions.
- 8. an arc with measure less than 180 degrees
- 9. arcs of a circle that have exactly one point in common
- 10. difference of 360 and the measure of its related minor arc

Down

- 1. arcs that have the same measure
- 2. measure of its central angle
- 3. arcs that have the same measure and are of the same circle or congruent circles
- 4. an arc with endpoints that are the endpoints of a diameter
- 5. an arc with measure greater than 180 degrees
- 6. an angle whose vertex is the center of a circle
