## 2.07 DIGESTIVE Medical Terminology

### Across

2. inflammation of the stomach and intestines, typically resulting from bacterial toxins or viral infection and causing vomiting and diarrhea.
6. an infectious and often fatal bacterial disease of the small intestine, typically contracted from infected water supplies causing severe vomiting and diarrhea.
8. the scientific study of the structure and disease of teeth.
10. inflammation of the urinary bladder. It is often caused by infection and is usually accompanied by frequent, painful urination.

11. a small carcinoma, either asymptomatic or giving rise to metastases without symptoms due to the primary carcinoma.

14. inflammation of the gums.

15. situated under the tongue.

### Down

1. process by which food is crushed and ground by teeth, chewing.

3. relating to the teeth.

4. a disease characterized by inflammation of the liver.

5. a disease of the intestine, especially the small intestine.

7. the internal organ in which the major part of the digestion of food occurs.

9. a chronic disease of the liver marked by degeneration of cells, inflammation, and fibrous thickening of tissue. It is typically a result of alcoholism or hepatitis.

12. a procedure in which a flexible fiber-optic instrument is inserted through the anus in order to examine the colon.

13. relating to, near, or on the side toward the tongue.
