Name: _____

20 Algebra Terms

Across

2. A real number that can be expressed as a ratio of two integers
4. A polynomial of one term
9. The number of a power that is used for a factor
11. Any number in a sequence
13. A mathematical phrase that can include numbers,variables,and operation symbols
15. A number that is multiplied by a variable
16. A graph with points plotted to show a possible relationship between two sets of data

18. A ratio that compares the amount of change in a dependent variable to the amount of change in an independent variable
19. A monomial or the sum or difference of two or more monomials
20. An equation involving two or more variables

Down

1. A symbol,usually a letter,that represents one or more numbers
3. An equation that involves one operation
5. A set of rational and irrational numbers

6. Equations that have the same solution
7. An equation that involves two operations
8. A relation in which every domain value is paired with exactly one range value
10. The coordinate(s) of the point(s) where a graph intersects the y-axis
12. A number that cannot be written as a fraction
14. A ratio that compares two quantities measured in different units
17. A value that does not change

Word Bank

Rational Number	Monomial	Function	Coefficient
Base of a power	Equivalent Equations	Variable	Rate of change
Scatterplot	One-StepEquation	Irrational Number	Polynomial
Algebraic Expression	Real Numbers	Two-Step Equation	Term of a Sequence
Constant	Rate	Literal Equation	Y-Intercept
