

# 2nd quarter 2016

## Across

3. Instead of leaning or \_\_\_\_, reposition a ladder closer to the work you are doing

6. A ladder shouldn't be used as a \_\_\_\_ or scaffold

8. If the weather turns bad when you are on a ladder, \_\_\_\_ immediately.

9. make sure you know the \_\_\_\_ limits of a ladder you are using

10. always keep at least three points of \_\_\_\_ with a ladder

12. use a tool \_\_\_\_ instead of carrying tools in hand

13. Check the area you will be working in for hazards, such as \_\_\_\_ or objects in the walkway

14. Don't \_\_\_\_ off a ladder

## Down

1. Place the base of a ladder on a firm, \_\_\_\_ surface

2. Inspect a ladder before and after a job - don't use a \_\_\_\_ or unsafe ladder

4. When climbing a ladder, always face it and grip the rungs, not the \_\_\_\_

5. Never lean a ladder against a window pane or other \_\_\_\_ surfaces

7. Proper ladder setup will help \_\_\_\_ slips and falls whether at home or work

11. don't stand higher than the \_\_\_\_ rung from the top of the ladder
