

### 3.03 Sensory Medical Terminology- Charlotte Routhier

#### Across

1. The study of the eye.  
 4. Surgical incision into the eardrum to relieve pressure or drain fluid.  
 12. Impaired or dim vision without obvious defect or change in the eye.  
 13. "Ear drainage". Indicates inflammation of the external or middle ear.  
 14. "Double vision". Two images of a single object that is displaced.

16. The material effect produced by refraction of different wavelengths of electromagnetic radiation resulting in failure to focus. It causes colored fringes in the images produced by uncorrected lenses.  
 17. Middle ear infection caused by a virus or bacteria.

#### Down

2. Repetition or imitation of the movements of others as a symptom of psychiatric disorder.  
 3. The tympanic membrane or eardrum.  
 5. The flow of tears.

6. A physician trained in anesthesia (a drug used for insensitivity to pain).  
 7. The spiral cavity in the inner ear which produces nerve impulses in response to sound vibrations.  
 8. The art of practice of taking and processing photographs.  
 9. Age related hearing loss with gradual inability to hear, especially high frequency sounds.  
 10. A graphic recording of sound.  
 11. A round or eyelike opening or design.  
 15. The transparent layer forming the front of the eye.
