# 3rd Quarter Word Wall Review

## Across

5. Two or more ratios that have the same value  
 9. A pair of numbers, such as (1, 2), that can be used to locate a point on a coordinate plane  
 12. A straight line  
 13. Two quantities that do not have the same ratio or unit rate.  
 14. A rate with a denominator of 1 such as 45 miles per 1 hour.  
 15. the horizontal axis on a coordinate plane

16. (0,0) on the coordinate plane

## Down

1. The first number of an ordered pair. It corresponds to a number on the x-axis.  
 2. The constant ratio in a proportional linear relationship  
 3. Two quantities that have the same or constant ratio or unit rate.  
 4. A plane in which a horizontal number line and a vertical number line intersect at their zero points

6. Four regions into which a coordinate plane is divided by the x-axis and the y-axis

7. The vertical axis on a coordinate plane  
 8. A ratio that compares two quantities measured in different units like 120 beats for 2 minutes.  
 10. A fraction that contains one or more fractions in its numerator or denominator.  
 11. The second number of an ordered pair. It corresponds to a number on the y-axis.
