4.05 REPRODUCTIVE Medical Terminology

Across

9. a physician or surgeon qualified to practice gynecology.
 10. relating to the narrow necklike passage forming the lower end of the uterus.
 12. a surgical operation to remove all or part of the uterus.
 13. inflammation of an ovary; ovaritis.
 14. a cell in an ovary that may undergo meiotic division to form an ovum.

15. the outermost layer of cells or tissue of an embryo in early development, or the parts derived from this, which include the epidermis and nerve tissue.

Down

1. A condition in which the tissue wall between the rectum and vagina weakens.
 2. an image obtained by mammography.
 3. inflammation of the mammary gland in the breast or udder, typically due to bacterial infection via a damaged nipple or teat.
 4. surgical removal of the fallopian tubes.

5. the process in which cells undergo meiosis to form gametes.

6. infestation with a yeastlike fungus, resulting in tumors in the lungs and sometimes spreading to the brain.

7. procedure to closely examine your cervix, vagina and vulva for signs of disease.

8. the surgical cutting and sealing of part of each vas deferens, typically as a means of sterilization.

11. an agent used to induce contraction or greater tonicity of the uterus.
