

Name: _____

Date: _____

5.1 5.2 word find

Across

2. _____ energy is the energy of moving electrons
 4. Is the conversion in plant of light energy to chemical energy
 5. Potential energy that has to do with height off of the ground
 8. When a force is applied in a certain direction
 9. A _____ converts chemical energy to electrical energy

12. This is the ability to do work

13. This is energy of motion

14. A hair dryer convert electrical energy to _____ energy

15. Potential energy that we use in food

Down

1. A rubber band is an example of _____ energy

3. Energy of position

6. This type of water has the least amount of kinetic energy

7. _____ energy is when air particles vibrate

10. _____ energy is the kinetic energy of movement of small particles

11. A _____ converts electrical energy to light and heat
