

Name: _____ Date: _____ Period: _____

Intro to Chemistry

Across

6. Made of a solvent and solute
8. Type of matter without specific ratio
10. Able to be drawn into wire
12. Type of element that has properties of both metal and nonmetal

13. What dissolves a solute

Down

1. Type of element that conducts electricity
2. Able to be pounded into sheets
3. Pure substance made with one type of atom

4. Pure Substance made of at least 2 atoms
5. Type of element that does not conduct electricity
7. What gets dissolved
9. Smallest particle that retains its properties
11. Able to dissolve
