

Name: _____

Date: _____

ATP

Across

5. Also known as the citric acid cycle.
7. An enzyme that catalyzes the hydrolysis of the terminal phosphate.
8. Reactions that take place in the presence of oxygen.
9. The mitochondria uses its energy.
10. ATP is required to drive these types of reactions.

Down

1. The process of oxidizing glucose and producing carbon dioxide and water.
2. ATP is considered the "energy _____" of life.
3. The predominant energy system used when exercising.
4. The end product of Glycolysis.
6. The majority of ATP is produced in this organelle.
