

A Twist on Vocab Ch. 13

Across

- 8.** Ther outer layer of the thermosphere
11. Winds that blow steadily from specific directions over long distances
12. The layer of Earth's atmosphere immediately above the stratosphere
13. The increased cooling that a wind can cause

Down

- 1.** Electromagnetic waves with wavelengths that are shorter than visible light but longer than X-rays
2. Waves that can transfer electric and magnetic energy through the vacuum of space
3. Electromagnetic waves with wavelengths that are longer than visible light but shorter than microwaves
4. The second-lowest layer of Earth's atmosphere

- 5.** The outermost layer of Earth's atmosphere
6. Winds that blow over short distances
7. The lowest layer of Earth's atmosphere
9. Reflection of light in all directions
10. The horizontal movement of air from an area of high pressure to an area of lower pressure
