## Ac circuits

## Across

3. Unit of impedance 6. RMS value of any AC parameter is mentioned in this form
4. Unit of real power
5. Unit of reactive power
6. Leading power factor is obtained in this sinusoidal signal circuit
7. Inverse of time period
8. The rating of any machine is given with this power
Down
9. R by Z is called as
10. Average value of
11. Average power in pure inductance 5. Frequency of AC signal in Asia 7. RMS
value/Average value 10. Unit of capacitance
