## Across

7. obtain (goods or a service) from an outside or foreign supplier, especially in place of an internal source.

8. a location where transfer is possible from one mode of transportation to another

10. A series of improvements in industrial technology that transformed the process of manufacturing goods.

13. things, especially foodstuffs, likely to decay or go bad quickly.

14. the most important city or town of a country or region, usually its seat of government and administrative center.

16. a colorless unstable toxic gas with a pungent odor and powerful oxidizing properties, formed from oxygen by electrical discharges or ultraviolet light. It differs from normal oxygen (O2) in having three atoms in its molecule (O3).

17. a place to dispose of refuse and other waste material by burying it and covering it over with soil, especially as a method of filling in or extending usable land.

18. relating to or promoting a worker's right not to be required to join a labor union

19. , including rain, snow, hail, fog, or dew, that is high in acid pollutants, especially sulfuric and nitric acid.

## Down

1. fuller form of CFC.

2. needing a large workforce or a large amount of work in relation to output.

3. the trapping of the sun's warmth in a planet's lower atmosphere, due to the greater transparency of the atmosphere to visible radiation from the sun than to infrared radiation emitted from the planet's surface.

4. influences that do not occur from within the individual but from elsewhere like the environment and others around you.

5. A complex chemical and atmospheric phenomenon that occurs when emissions of sulfur and nitrogen compounds and other substances are transformed by chemical processes in the atmosphere and then deposited on earth in either wet or dry form

6. type of smog produced when ultraviolet light from the sun reacts with nitrogen oxides in the atmosphere.

9. is the amount of dissolved oxygen needed

11. location factors related to the cost of factors of production of materials into and from a factory

12. a type of cloth or woven fabric.

15. the presence in or introduction into the air of a substance which has harmful or poisonous effects.
