

Agriscience

Across

- 3. Using genetics to make a particular breed
- 8. Offspring
- 9. life
- 13. Hormone produced by cow's pituitary glands
- 14. All the people living at the same time
- 16. Connecting genes
- 18. Adenine, Thymine, Guanine, Cytosine
- 19. A unit of heredity that is passed from parent to offspring

20. Passing characteristics genetically

- 21. Organic compound consisting of galactose
- 22. A record of the DNA sequence

Down

- 1. A complex organic substance
- 2. Chemical used to keep frost off of plants
- 4. Procedures that are used to join together DNA
- 5. Manipulating characteristics of an organism

6. Environmental influences determine which animals thrive better than others

- 7. A hormone that regulates blood sugar
- 10. Operation that pairs elements to a second set of elements
- 11. Deoxyribonucleic Acid
- 12. Exact replica
- 15. Hormone given to feeder pigs to regulate lean meat to fat
- 17. The study of heredity
