# AlexisP1

## Across

1. circuit of lower resistance
3. when two points from a line electric current force are idirected
9. doesn't allow the passage of heat or sound
10. an incomplete circuit

11. flow of an electrical current is allowed
  13. closed circuit with two or more points
- ## Down
2. electric current with a reversed direction
  4. created when an electric charge flows

5. resistors are arranged in a chain
6. current which flows in only one direction
7. a region around a magnetic material
8. flow of an electric current is opposed
12. voltage across an ideal conductor
