

Algebra 1 Vocabulary

Across

- 4.** The x-axis is a _____ line that has a slope of zero.
- 7.** The highest value in a set or on a graph.
- 11.** The difference in y values divided by the difference of x values. Also known as rise over run.
- 12.** To multiply out the parts of an expression known as the _____ Property.
- 15.** The _____ of a number says how many times to use the number in a multiplication. Also called powers
- 16.** The point or points where the graph of a quadratic function hits the x-axis. These are also called zeros.

- 17.** An algebraic expression with two terms.

- 19.** A function that creates a parabola

- 21.** An algebraic expression with three or more terms.

- 22.** A "U-shaped" graph created from a quadratic function.

Down

- 1.** The y-axis is a _____ line that has an undefined slope.

- 2.** On the coordinate plane, the pair of numbers giving the location of a point (ordered pair).

- 3.** Orders of Operations

- 5.** To reduce or put in simplest terms.

- 6.** The point where the graph crosses the Y axis

- 8.** symbol that represents one or more numbers

- 9.** The lowest value in a set of numbers or the lowest point on a graph.

- 10.** The answer when you add.

- 13.** A sentence with an equal sign

- 14.** An algebraic expression with only one term.

- 18.** The answer when you multiply.

- 20.** Consecutive means that things are _____.
