Algebra Terms

Across

- **3.** A single repetition of an experiment.
- 6. A circle with a radius of one.
- **11.** The sum of the terms of a sequence.
- **12.** A polynomial with one term.
- **18.** A polynomial with three terms.
- **19.** A set with a definite number of elements.
- **22.** A logarithm with base e, written as In.
- **23.** An event made up of 2 or more simple events.
- **24.** A list of numbers that often form a pattern.

- 25. A part of the population.
- **26.** The entire group of people considered for a survery.
- **27.** An event consisting of only one outcome.

Down

- **1.** An indicated root of a quantity.
- **2.** A number that describes a sample.
- **4.** A sequence in which the ratio of successive terms is a constant r.
- **5.** A sequence with a finite number of terms.
- **7.** A system of equations containing only linear equations.
- **8.** A monomial or a sum or difference of monomials.

- **9.** A unit of angle measure based on arc length.
- 10. Constant Ratio
- **13.** The indicated sum of terms of a geometric sequence.
- 14. A polynomial with two terms.
- **15.** A sample in which member volunteer to participate.
- **16.** An set of outcomes in a probability experiment.
- **17.** A collection of items called elements.
- **20.** An element or number in the sequence.
- **21.** An algebraic expression that defines a function.
