Name: _____   Date: _____   Period: _____

Algebra Terms

Across

3. a factor that is commo to all terms of an expression or to two or more expressions

4. an expression that contains only numbers and operations

7. terms with the same variables raised to the same exponents

9. a value that is substituted for the independent variable in a relation or function

12. a table that lists the number of times, or frequency, that each data value occurs

13. the number that indicates how many times the base in a power is used as a factor

15. a number that is multiplied by a variable

17. a bar graph used to dsplay data grouped in intervals

18. the process of writing a number or algebraic expression as a product

19. a relation in which every domain value is paired with exactly one range value

20. the number of times the value appears in the data set

Down

1. numerical data

2. lines in the same plane that do not intersect

5. an expression that contains at least one variable

6. the set of all first coordinates (or x-values) of a relation or function

8. a value that does not change

10. a polynomial with two terms

11. the sum of all avlues in a data set divided by the number of data values

14. a mathematical statement that two expressions are equivalent

16. the median of the lower half of a data set, denoted Q1
