

Algebra and Measurement Review

Across

- 2. The area formula for a triangle is base x height divided by
- 5. The coefficient in the expression $6b + 3$ is
- 8. A number on its own in an algebraic expression/equation is known as a _____
- 10. The area formula for a parallelogram is _____ x height
- 11. A quadrilateral has _____ sides

- 14. The unit for area is
- 15. Subtract also means
- 16. A, x and c are examples of
- 19. Quotient also means
- 20. Evaluate $2x = 22$
- 21. The unit for volume is

Down

- 1. Multiply also means
- 3. The area formula for a rectangle is length x _____
- 4. If $x = 4$, substitute and solve $x + 6$

- 6. The number in front of a variable is called the
- 7. The volume formula for a rectangular prism is length x width x _____
- 9. Evaluate also means
- 12. Addition also means
- 13. $2x + 1 = 4$ is an example of an algebraic _____
- 17. The area formula for a square is side x _____
- 18. There are _____ hundred cm in 1 m
