

Name: \_\_\_\_\_

Date: \_\_\_\_\_

Period: \_\_\_\_\_

# All About Angles Word Puzzle

## **Across**

- 3. Non adjacent interior angles that lie on opposite sides of the transversal.
- 4. A triangle that has no congruent sides.
- 6. A conclusion reached by using inductive reasoning.
- 9. A line that intersects two or more coplanar lines at distinct points.
- 14. A conjecture that is proven.
- 16. A triangle that whose sides are \_\_\_ congruent
- 17. Two angles whose sides are opposite rays.
- 21. Coplanar lines that do not intersect.
- 22. Planes that do NOT intersect.

- 23. A triangle that has at least two congruent sides.

## **Down**

- 1. A line , or ray that is to the segment at it's \_\_\_\_\_
- 2. Non adjacent exterior angles that lie on opposite sides of the transversal.
- 5. An example showing that a statement is false.
- 7. Interior angles that lie on the same side of the transversal.
- 8. Two lines that intersect to form right angles
- 10. Angles that lie on the same side of the transversal and in corresponding positions.
- 11. Two angles whose measures have a sum of \_\_\_ degrees. Each angle is called the \_\_\_\_\_ of the other.

- 12. Two angles whose measures have a sum of 90 degrees. Each angle is called the \_\_\_\_\_ of the other.

- 13. Two coplanar angles with a common side, a common vertex, and no common interior point. ( chicken feet )
- 15. Non - coplanar they are not parallel and do not intersect
- 18. The statement by reversing the hypothesis and conclusion of a conditional.
- 19. A pair of adjacent angles whose non - common sides are opposite rays. The angles of a linear pair form a straight line.
- 20. An accepted statement of fact.
