

Anatomy

Across

2. shoulder muscle
 4. posterior thigh muscle
 7. breathing muscle
 12. anterior pelvic tilt
 13. flat triangular bone over ribs
 15. connective tissue
 19. joins to the thoracic vertebrae
 20. hip bones
 22. joins muscle to bone

Word Bank

rib cage	diaphragm	tarsals	dominant	tendon	gluteus maximus
hamstring	skeleton	femur	latissimus dorsi	hip	atlas
disc	facet	fascia	sarcomere	sacrococcygeal	glenohumeral
ASIS	deltoid	synovial	patella	hinge	scapula
swayback	core	fibula	pectoralis		

23. joins to head
 26. chest muscle
 27. freely moveable joint
 28. bones of the feet
Down
 1. shoulder joint
 3. preferred hand
 5. buttocks
 6. large back muscle
 8. leg bone, bears no weight

9. structural unit of muscle
 10. vertebrae fused together
 11. stores minerals
 14. shock absorber for vertebrae
 16. muscles: pelvic floor - diaphragm
 17. ball and socket joint
 18. gliding joint
 21. longest bone
 24. protects the knee
 25. knee joint
