

Anatomy and Physiology

Across

4. Pulmonary arteries that send blood to lungs

6. Smallest blood vessels in the body

8. Sends blood from body to the heart

9. Receiving/ holding chambers for blood

10. Mitral; valve between left atrium and ventricle

11. Inner lining

12. Outer membrane

Down

1. Valve between right atrium and ventricle

2. Space between lungs, backbone, and sternum

3. Heart string

5. Sends blood away from the heart of the body

7. Separates the right and left sides of the heart
