Name:	Date:	

Anatomy

Across

- 2. A high blood glucose level
- **7.** Cells of islet of langerhans of the pancrea that secrete the hormone glucagon
- **9.** Epinephrine and norepinephrine
- **12.** The conversion of glucose to glycogen to be stored as potential energy
- **14.** The conversion of excess amino acids to simple CHO
- 15. Drowsiness
- **16.** The condition of being abnormally small

- **18.** The temporary endocrine gland formed from an ovarian follicle that has released an ovum
- **20.** Hyposection of the thyroxine
- **21.** A disease in secretion of hormones
- **22.** Hyposecretion of thyroxine in an infant
- **23.** Excessive growth of the body or its parts
- **24.** High blood calcium level **Down**
- 1. A metabolic acidosis
- 3. Hypersection of growth
- 4. Prostaglandins

- 5. Monosaccharide
- 6. Polysaccharide
- **8.** All the reactions that take place in the body
- 10. The pituitary gland
- **11.** Cells of the islets of langerhans of the pancreas that secrete the hormone insulin
- **13.** Same effects ac sympathetic impulses
- **17.** An enlargement of the thyroid gland
- 19. A hormone secreted by the thyroid gland
