

# Anatomy of the Heart

## Across

1. Which wall is thinner, the right ventricle or the left ventricle?
4. What muscle is inferior to the heart?
6. The \_\_\_\_\_ is a thin oval depression in the atrial wall.
9. What is the pointed end of the heart?
10. What is the most superficial layer of the heart?

12. The \_\_\_\_\_ appears as three small cusps between the right ventricle and the pulmonary trunk.
13. Carries blood from the lungs to the left atrium.
14. The \_\_\_\_\_ encloses the heart and has two layers
15. A large venous space that carries blood from the cardiac veins to the right atrium:

## Down

2. The \_\_\_\_\_ extends to the apex of the heart.
3. What is the middle and thickest layer of the heart wall?
5. The \_\_\_\_\_ is located at the junction of the ventricle and the ascending aorta.
7. What are the two ear like flaps on the anterior, superior atria?
8. Is the right atrium inferior or superior to the right ventricle?
11. What is the blunt end of the heart?
