## Angles

## Across

- **3.** an angle that is 360° exactly
- **5.** each of the pairs of opposite angles made by two intersecting lines.
- **9.** an angle that is greater than 180°
- 10. goes counterclockwise
- **12.** the figure formed by two rays
- **13.** the angle between any side of a shape, and a line extended from the next side.

- **15.** an angle that is greater than 90° but less than 180°
- **16.** the two straight sides of an angle
- 17. an angle less than 90°
- 19. an angle inside a shape
- **20.** angle pairs whose measures sum to one right angle

## **Down**

- **1.** Two angles that sum to a straight angle
- **2.** angle pairs whose measures sum to one right angle

- **4.** the acute version of any angle determined by repeatedly subtracting or adding straight angle
- **6.** angles that share a common vertex and edge but do not share any interior points.
- 7. a unit of angle measurement
- 8. goes clockwise
- **11.** an angle that is 180° exactly
- **14.** an angle that is 90° exactly
- **18.** The corner point of an angle
