# Angles

## Across

4. 2 angles whose sum is 180

6. a line that intersects 2 lines at once

7. 2 angles whose sides form two pairs of opposite rays

10. two rays with the same endpoint

11. 2 angles who share a side; they are "touching"

12. interior angles that lie on the same side of the transversal

13. a ray that divides an angle into 2 congruent angles

## Down

1. interior angles that lie on opposite sides of the transversal

2. exterior angles that are on the same side of the transversal and  $\neq 180$

3. exterior angles that are on opposite sides of the transversal

5. 1 interior angle, 1 exterior angle; both are in the same "position"

8. synonym for "supplementary"

9. 2 angles whose sum is 90
