

Animal And Plant Cells

Across

1. 10-30 micrometers in size
 3. typically round or circular in shape
 8. only in plant cell and causes photosynthesis
 9. 10-100 micrometers in size
 11. positioned in center of animal cell and on one side of the plant cell

12. surrounds cell membrane and is only in plant cells
 13. vacuole takes up to 90% of space
 14. has 1 or more vacuoles
 15. only in animal cell and mostly contains food, water, and waste

Down

2. only in plant cells and mostly contain water

4. gets majority of energy from mitochondria
 5. has 1 vacuole
 6. typically rectangular or square in shape
 7. gets most of its energy from sunlight
 10. always in animal cells and sometimes in plant cells
