# Animal and plant classification

## **Across**

- 2. True bacteria
- 6. A invertebrate with radial symmetry
- 7. With backbone
- 10. Invertebrate that lives part of the time on land
- 13. Lacking in water-transport system
- 14. A tube-like water-transport system

- 15. The highest level of biological classification

## **Down**

- 1. A single-celled or multi-cellular organism that may share characteristics with plants, fungi, and animals
- 3. Ancient bacteria
- 4. A tool used to identify organisms (two words)
- 5. Without a backbone

- 8. A vascular plant that produces seeds from flowers
- 9. A vascular plant that produces seeds, but not flowers or fruits
- 11. A kingdom of organisms, with a nucleus that get nutrients by decomposing other organisms
- 12. Small single-celled organisms that do not have a nucleus
