

Name: _____

Date: _____

Animal cells and Plant cells

Across

2. Whats found in the nucleus

3. A cell without a nucleus

10. Which cell has many small vacuoles

11. The _____ER in both animal and plant cell make membranes

12. Considered the "powerhouse" of the cell and found in plant cells and animals cells

13. A nucleus in a plant cell is an example of a _____

14. gel like fluid made mostly of water in the cell

15. The _____ in the plant cell is for extra support.

Down

1. Which cell can produce their own food

4. In animal and plant cells, _____ create a network of throughout the cytoplasm

5. What organelle helps a plant cell make food for itself

6. A cell with an nucleus

7. what is one thing the animal cell has that the plant cell dose not

8. In both animal and plan cells, _____ are where proteins are created

9. _____ acts like a screen for the cell

Word Bank

Mitochondria

Cytoplasm

Smooth

DNA

Membrane

Vacuole

Rough

Eukaryote

Chloroplasts

Cell wall

prokaryote

Animal cell

Ribosomes

Organelle

Plant cell
