

Area and Circumference

Across

3. The inside of a closed geometric figure

4. The distance around a Circle

8. A line segment that has one end point at the center of and another on the circle and is half the diameter

10. A line segment whose end points are on the circle

11. Could be also known as radius of a circle

13. Half of a circle or its circumference

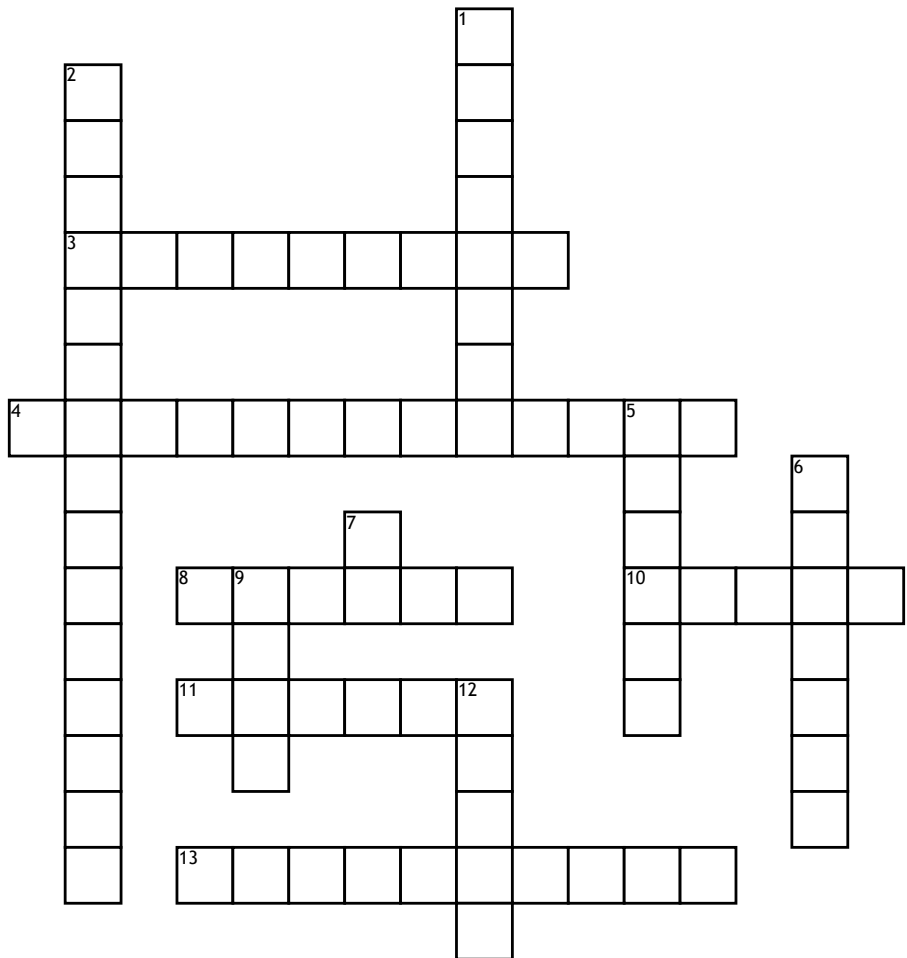

Down

1. A Chord that passes through a circle

2. A figure that can be divided into more than one basic figure

5. The set of all points that are equal from a point called a center

6. An expression that used to help solve a mathematical problem

7. The ratio of a circle's circumference represented as 3.14 or $\frac{22}{7}$

9. The quantity that expresses the extent of a two-dimensional figure

12. A relationship between two numbers indicating how many times the first number contains the second.
