

Assessment Terminology

Across

8. This form of testing requires the student to perform precisely the skill being tested

9. This is to gauge students' progress and does not have a mark

10. Do a team of markers all grade the paper the same?

11. This test measures how much a student has learned over a period of time.

Down

1. This refers to whether or not the test measures what it claims to measure.

2. This test reveals areas that a student needs help with

3. A test that uses one type of activity to reveal abilities in an underlying skill

4. When a teacher focuses all their lessons on what will be in the final test

5. This test is to create groups of students more or less at the same level

6. This test is designed to show students' language knowledge and skills. Used to determine ability for future work/study

7. This test is at the end of a course of study, the final outcome
