# Astronomy-Lesson 1

## Across

4. Study of outer space
7. An ancient monument in England that may have been used to predict the arrival of spring and other seasons
9. An object that is made by man and sent into space to orbit around the earth.
10. A scientist who discovered that the Earth revolves around the sun, rather than the sun revolving around the Earth, as was believed at the time
11. A long time ago, the sun, planets, and stars also helped sailors know which direction to sail

## Down

1. A physical force causing objects to pull on other objects, such as with the sun pulling on the Earth
2. The man-named patterns of stars in the night sky
3. Someone who is trained to travel in a spaceship into outer space
5. Everything that exists in space, including the Earth, planets, sun, and stars
6. A scientist who built telescopes and studied astronomy
8. America's space agency, called the National Aeronautics and Space Administration
