# Astronomy

**Across**

- 2. Does not dominate this region in space
- 3. When a planet is furthest from the sun
- 6. Ground layer
- 9. Deviation of curve or orbit
- 10. Property of a physical body
- 11. Oval shaped orbit
- 13. Any minor planet that orbits the sun
- 17. Outer layer
- 18. Curved path of a celestial object

- 20. Small rocky or metallic body
- 21. How long it takes to complete a orbit
- 23. Astronomical body that orbits a star
- 24. Layer below the crust
- 25. Mainly comets and asteroids

**Down**

- 1. Beyond the orbit of neptune
- 4. Planet that orbits a star
- 5. Something that orbits a larger body
- 7. Angle between the orbital plane

- 8. Envelope of gases
- 12. Flies just over earth
- 14. When a planet is closest to the sun
- 15. The innermost part of a planet
- 16. Rock shaped object orbiting earth
- 19. What a planet spins on
- 22. A straight line passing from side to side
