

Astronomy Project

Across

1. The biggest planet in our solar system
3. The star in the middle of our solar system
7. A group of stars that can be seen by the human eye and form a pattern that can look like objects or creatures
9. A rock that comes from space and goes into a planet's atmosphere and either gets destroyed by the friction or hits the planet
10. A planet people believe there is possibly life on

Down

2. Once thought to be a planet, is now reclassified as a dwarf planet
4. A type of space rock that has an ice and dust core and sometimes has a tail
5. A type of space rock that orbits around the sun and can get caught in other planets' gravitational field
6. A giant home to thousands of gas giants, stars, and planets
8. The planet you and thousands of other creatures live on
