

Atomic Structure

Across

3. What's missing protons, neutrons and?

9. What is the bottom number of an element symbol?

10. What charge does a proton have?

Down

1. What charge does a neutron have?

2. What is the top number of an element symbol?

4. What is the only element without a neutron?

5. How many electrons can be shown on the 1st ring of electron configuration?

6. What mass does an electron have?

7. What element is Sn

8. How many electrons are on the outer shell of sodium?
