

Atomic Structure

Across

2. What carry no charge?
 5. What are the elements categorized in?
 8. What has no mass because it's very small?
 10. Which element has the atomic number of one?
 11. What is everything made up of this?

12. This is at the top of the element.
 13. This scientist realized the atom is mostly made up of empty space.
 14. This is the same as the atomic number.
 15. What is an atom mostly made up of?

Down

1. This is at the bottom of the element.

3. Unit of mass for an atom.
 4. This scientist realized atoms have electrons.
 6. What is the center of an atom?
 7. Where is all the elements placed?
 9. Who came up with the first theory about atoms?
