

Name: _____

Date: _____

Atomic Structures

Across

3. Has a negative charge and found in a certain energy level in the electron cloud
7. Found in the nucleus and has no charge
8. The outermost energy level
9. The center of the atom, it has a positive charge and contains protons and neutrons
10. The building blocks of matter and the smallest unit of matter

Down

1. It can identify the element it tells you how many electrons and protons you have in the element
2. Tells you how much an element weighs it also stands for amu
4. It holds the electrons
5. Surrounds the nucleus electrons are likely to be found orbiting the nucleus
6. It's found in the nucleus it has a positive charge
