

# Aubrey

## Across

3. Weather tool to measure air pressure changes  
 4. To find patterns in data  
 6. A huge body of air that has similar temperature, pressure, and humidity throughout  
 8. The area where air masses meet and do not touch  
 11. A person who studies the weather

12. The conditions and temperature outside

13. The rise and fall of earth's oceans ( and lakes ) due to the sun and moon's gravitational pull's  
 14. The metric temperature scale; water freezes at 0 and boils at 100  
 15. Scale to measure temperature, expressed as F

## Down

1. A statement of something likely to happen  
 2. Natural movement of air  
 5. Weight of air pushing on everything it surrounds  
 7. Device for measuring temperature  
 9. Average state of weather in a time or place  
 10. Sense, find or discover something
