

Name: _____

Date: _____

B4 Revision

Across

1. site of aerobic respiration
3. the production of CO₂ in _____ causes it to rise
5. aerobic respiration has _____ present
6. _____ factor is somethings which can slow down the rate of Photosynthesis

9. _____ is an essential reactant in respiration
10. waste product of anaerobic respiration in microbes
11. anaerobic _____ lacks oxygen, and produces less energy per glucose
12. _____ dioxide is a reactant in Photosynthesis

Down

2. Glucose in plants is used to make
4. This controls rate of Photosynthesis along with light and CO₂ levels
7. glucose in humans is stored as
8. glucose in a plant is stored as
