

BASICS OF ENGINEERING

Across

5. FET is a _____ type of device.
8. A joining part of equal elevation is known as _____ line.
10. Area under force- displacement diagram represents _____.
14. Permeance of magnetic circuit is defined as reciprocal of _____.
16. Dissolved organic impurity in water removed by _____.
17. A differentiator produces _____ for a step input.
18. Which is most common language used in web designing ?
20. Coating of zinc on iron or steel is called as _____.

Down

1. If a computer has more than one processor then it is known as _____.
2. Co₂ gas is use in _____.
3. A rail is rest on _____.
4. _____ region lies between visible and microwave region in electromagnetic spectrum
6. Macrophytes like hydrilla is produces in _____ ecosystem.
7. The inverse of resistivity is _____
9. If the coating metal is higher placed in galvonic series then the bare metal , then the coating is called as _____.

11. Technology used to provide internet by transmitting data over wires of telephone network is ?

12. In _____ technique of polymerization highly pure product is form.
13. When both acceleration and velocity are tangential to path if partical, motion is _____.
15. Temporary hardness of water is removed by _____.
19. _____ gears used to connect two intersecting shaft axes.

Word Bank

Fire extinguisher	Anodic	DsL	Boiling	Steeper
Contour	Oxidation	Reluctance	Spike	Conductivity
Bulk	Unipolar	Rectilinear	Infrared	Workdone
Bevel	Multiprocessor	Galvonising	Html	Pond
