

BIOLOGY CROSSWORD

Across

- 5. Deoxyribonucleic acid
- 8. A diploid organism with two alleles, each of a different type.
- 9. A stage during eukaryotic cell division in which the chromosomes are segregated to opposite poles of the cell.
- 10. The stage before anaphase.

Down

- 1. The biochemical pathway which converts the energy of light into glucose molecules.

- 2. An interaction between organisms from different species, usually benefiting one or both species.
- 3. Single celled microorganisms with prokaryotic cells.
- 4. The cycle that describes how living animal cells generate the energy used by the body.
- 6. The study of living organisms.
- 7. A highly motile eukaryotic, unicellular organism.
