# BIO DNA

## Across

2. Pairs with Guanine

4. 3 nucleotides on mRNA

8. DNA to mRNA (happens in nucleus)

11. One of the founders of DNA

13. Code for our genes made of repeating subunits called nucleotides

14. Pairs with Thymine

15. Holds DNA together

## Down

1. 3 nucleotides on tRNA

3. Appears only in RNA

5. Subunits of DNA

6. Shape of DNA

7. The sugar in DNA

9. mRNA->tRNA->Amino Acids->Polypeptides

10. Pairs with Cytosine

12. Pairs with Adenine

## Word Bank

Nucleotides

Uracil

Watson

Guanine

Codon

DNA

Adenine

Double Helix

Cytosine

Translation

Thymine

Deoxyribose

Transcription

Anticodon

Hydrogen Bonds
