# BIO PROJECT

## Across

6. behavior of species in the context of mating rituals  
 9. distinct form or version of something.  
 10. prevents species from mating because they breed at different times.  
 11. a group of living organisms consisting of similar individuals  
 12. gene variant in a population.  
 13. the stock of different genes in an population

 EVOLUTION  
 SPECIES

14. a particular section, group, or type of people or animals living in an area

15. a population of animals, plants, or other organisms that are separated from exchanging genetic material

## Down

1. gradual development of something, especially from a simple to a more complex form.  
 2. formation of new and distinct species

3. species may live in the same area, but properties of individuals prevent them from interbreeding.

4. believed to be the main process that brings about evolution.

5. change by which an organism or species becomes better suited to its environment.

7. organism's ability to survive and reproduce in a particular environment.

8. deals with the geographical distribution of plants and animals.
