

Name: _____

Date: _____

Bio

Across

10. What occurs at the end of meiosis and mitosis
 11. Last phase of cell division
 13. What has nucleic acid's in protein and is found in the nucleus
 14. disease caused by cell growth
 15. What is it called when cells divide it into two daughter cells
 17. A bad or threatening tumor
 18. Type of reproduction in which the offspring are identical to the parent

19. Second stage of cell division chromosomes attached to spindle's

20. What is it called when cells produce cell count by a half

Down

1. Series of events in a cell that produced more cells
 2. Failure of the separation of chromosomes during nuclear division
 3. A mature haploid
 4. A protein that regulates cell division

5. Any chromosomes that aren't sex chromosomes

6. What part of the cell conduct cytokinesis

7. Equal dominance over a single trait

8. Chromosomes in the nuclei are called

9. Process of fertilizing an egg

12. What has a single set of unpaired chromosomes

16. Space between the first and second divisions of mitosis
