

Name: _____

Date: _____

Bio geochemical cycles

Across

- 2. What nitrogen is needed to make
- 7. Compound that results from living things and contains carbon
- 9. Coal or gas
- 10. Organisms that grow and break down waste

Down

- 1. When Bacteria oxidizes ammonia into nitrites
- 3. Movement of water between reservoirs
- 4. The process of nitrogen turning into ammonia
- 5. Conversion of nitrogen to ammonia
- 6. Water in soil or underground
- 8. Makes up 72% of the atmosphere
