

Biological molecules

Across

5. In the biuret test, the solution turns _____ when proteins are present.

8. The solution used to test for reducing sugars.

9. The reagent used to test for starch.

10. Fats are made of one _____ and three fatty acids.

Down

1. _____ acid makes up a protein.

2. The basic unit of a glycogen molecule

3. Proteins are also known as _____

4. When ethanol is added to fats, an _____ is formed.

6. If reducing sugars are present, a _____ precipitate is formed.

7. The reagent used to test for fats.
