

Name: _____

Date: _____

Biology CP 1: Lessons 2.1 and 2.2

Across

2. Chemical bond when electrons are transferred
 4. Attraction between molecules of the same substance
 6. A material composed of two or more elements or compounds that are physically mixed together but not chemically combines
 9. Compound that forms hydrogen ions in solution ; a solution with pH of less than 7

11. A measurement system that indicates the concentration of hydrogen ions in a solution
 12. The substance in which the solute dissolves
 13. The attraction between molecules of different substances

15. A negatively charged particle

Down

1. A substance formed by the chemical combination of two or more elements in definite proportions

3. The smallest unit of most compounds

5. The basic unit of matter
 7. Atom that has a positive or negative charge

8. Chemical bond when electrons are shared
 10. compound that produces hydroxide ions in solution; solution with a pH of more than 7

14. The substance that is dissolved
