

Biology Crossword Puzzle

Across

4. Natural selection is called this (4 words)
 6. Proteins that respond to events inside the cell (2 words)
 9. Region coding for proteins
 10. Autosome- chromosome that is not a sex chromosome
 12. Scottish geologist who inspired Darwin
 14. Alkaline proteins found in eukaryotic cell nuclei
 15. Stage of mitosis and meiosis in which the chromosomes move to opposite ends of the nuclear spindle
 16. Also known as tumor protein (2 words)
 17. Preserved evidence from past life
 18. Variant form of a given gene

19. Transfer RNA

21. Failure of homologous chromosomes to separate properly during cell division
 22. Group of proteins that control the development of cells through the cell cycle
 23. Made up of DNA
 24. Segment of a DNA or RNA molecule that does not code for proteins and interrupts the sequence of genes
 25. Also known as purebred (2 words)

Down

1. Unit consisting of two nucleobases bound to each other by hydrogen bonds (2 words)
 2. Competition for resources needed to live (3 words)

3. Process a parent cell divides into two or more daughter cells (2 words)

5. Chromosomal formation
 7. Scientific educated guess
 8. Timeframe
 11. Group of diseases involving abnormal cell growth with the potential to spread to other parts of the body
 13. Genes transferred from another species
 20. Made up of 5 carbon sugar, a phosphate group, and a nitrogenous base
