

Name: _____

Date: _____

Biology Sem 1 Exam Vocab Review

Across

- 2. micrograph of homologous pairs
- 3. site of photosynthesis
- 5. highest taxonomic category
- 11. protein of chromosomes
- 13. genetically determined characteristic
- 15. transfer of pollen
- 16. pigment in chloroplast
- 18. produces own food

19. specialized collection of tissues

20. site of gas exchange in plants

23. sugar, phosphate, and nitrogenous base

24. sugar of DNA

25. beginnings of new cell wall

Down

1. not sex chromosomes

4. science of heredity

6. relies on other organisms for food

7. 4 chromatids

8. sugar of RNA

9. transfer of DNA fragments

10. the study of life

12. smallest unit of life

14. causes disease/highly infectious

17. encodes amino acids

21. explanation

22. gene that governs characteristics
