

Name: _____

Date: _____

Biology Vocab

Across

2. Voltage change across a membrane.
4. Receives signals and carries them toward the neuron's cell body.
7. The body's primary information processing center.
9. Neurons that carry information about stimuli to the CNS.
10. Information about an environmental change.

Down

1. All the nervous tissue outside the CNS
3. Neurons located entirely within the CNS.
5. Rapid, automatic response
6. Carries electrical impulses away from the cell body and towards other cells.
8. A bundle of neuron fibers surrounded by connective tissue.
